Projects

"Apple E-Commerce" - ENE 2022 - FEB 2022

Development of a SPA using React for the Front End, and Redux as stage management. All the styles on the components were developed with Bootstrap and external libraries (SweetAlert, React-Chatbot, etc).
It consumes data from an JSON file made by our team through Back End developed in NodeJS using Express.
Management of the Data Base with Sequelize
This project is about en E-Commerce of Apple products, where you can search for the item you want and buy it using MercadoPago payment method. Using FireBase for the authentication for Google and local login. Deployed Back-End using Heroku and Front-End using Vercel. Added a ChatBot for a better user experience.

"Food App" - OCT 2021 - OCT 2021

Development of a SPA using React for the Front End, and Redux as stage management. All the styles on the components were developed with pure CSS (no external libraries).
It consumes data from an API through Back End developed in NodeJS using Express.
Management of the Data Base with Sequelize
Characteristics of the project:
- Sort by letter
- Sort by score
- Filter by type of diet
- Create your own recipe

"DOG APP" - OCT 2021 - NOV 2021

Development of a SPA using React for the Front End, and Redux as stage management. All the styles on the components were developed with pure CSS (no external libraries).
It consumes data from an API through Back End developed in NodeJS using Express.
Management of the Data Base with Sequelize
Characteristics of the project:
- Sort by letter
- Sort by weight
- Filter by temperament
- Create your own dog

Education

Instituto Industrial Luis Augusto Huergo (Mechatronic Technician) - MAR 2012 - DEC 2017
